February is National Heart Month

Are you at risk for a
Heart Attack?

Call to make your appointment
574-946-2193

Would make a great gift!

A \$49 HeartScan can help determine your risk

A HeartScan is a quick and easy CT scan that measures the amount of calcified plaque in your coronary arteries. This scan can detect plaque within the coronary arteries well before you notice any symptoms of heart disease, giving you the opportunity to take measures to reduce your chances of a heart attack, stroke or other form of cardiovascular disease.

What to Expect:

- Allow 30 minutes for your appointment
- You will be fully clothed
- You will be asked to hold your breath a couple of times while images are being acquired
- No injections
- Your results will be reviewed with you by the CT technologist before you leave and a report will be provided for you to take home
- A copy of the results will be sent to your primary care physician

Risk Factors for Heart Disease:

- *Family History of heart disease*
- *Obesity*
- *High Blood Pressure*
- *High cholesterol levels*
- *Smoking*
- *Diabetes*

Who should have a HeartScan?

Consult with your physician to see if a HeartScan would be beneficial for you. Based on your medical history, your physician can determine if you are at risk for heart disease.
