Don't Be the One Who Gets Eliminated.

Crohn's Polyps
 You You
 Ulcers Anemia
 You You
 Colon Cancer
 YOU?

March Is Colorectal Cancer Awareness Month.
 Don't get caught up in the madness, schedule a Colonoscopy today.

Early detection is key in treating any illness. In addition to detecting cancerous tumors, colonoscopies can help find the cause of:

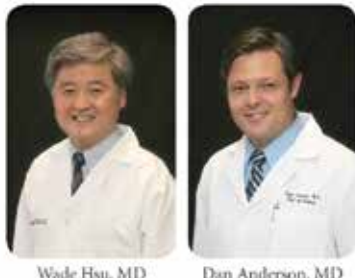

- Blood in the stool or rectal bleeding
- Dark or black stools
- Chronic diarrhea
- Iron deficiency anemia
- Sudden, unexplained weight loss
- Long-term, unexplained stomach pain

And can also:

- Check the colon after abnormal results from a CT scan, MRI, stool test, or barium enema
- Watch or treat inflammatory bowel disease (IBD)

You should begin screening for colorectal cancer after turning 50, then continue getting screened at regular intervals. However, you may need to be tested earlier than 50 or more often than other people if:

- You or a close relative have had colorectal polyps or colorectal cancer
- You have inflammatory bowel disease, Crohn's disease or ulcerative colitis
