Reader Advisory: the National Trade Association we belong to has purchased the following classifieds. Determining the value of their service or product is advised by this publication. In order to avoid misunderstandings, some advertisers do not offer "employment" but rather supply the readers with manuals, directories and other materials designed to help their clients establish mail order selling and other businesses at home. Under NO circumstance should you send any money in advance or give the client your checking, license ID, or credit card numbers. Also beware of ads that claim to guarantee loans regardless of credit and note that if a credit repair company does business only over the phone it's illegal to request any money before delivering its service. If You Can Remember This, It's Time For A Colonoscopy

**Anyone
at Any Age
Can Get
Colorectal Cancer.**

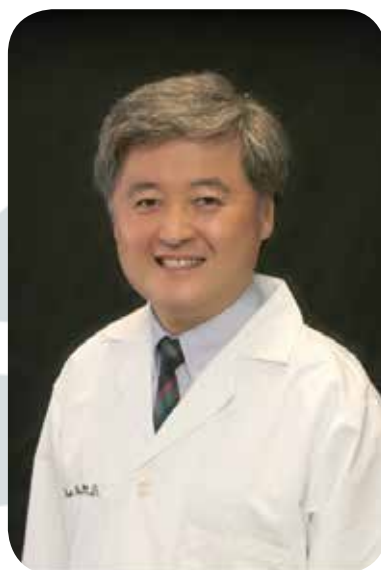

Sometimes there are no symptoms. Regular screening can often prevent colorectal cancer by finding and removing polyps before they have the chance to turn into cancer. Screening can also often find colorectal cancer early, when it is most likely to be curable.

Colonoscopies can also help find the cause of:

- Blood in the stool or rectal bleeding
- Dark or black stools
- Chronic diarrhea
- Iron deficiency anemia
- Sudden, unexplained weight loss
- Long-term, unexplained stomach pain

And can also:

- Check the colon after abnormal results from a CT scan, MRI, stool test, or barium enema
- Watch or treat inflammatory bowel disease (IBD)
